I would have been happier if it did not come with a surround sound option, and I would have preferred HDMI input rather than component. I guess that is what you get with a newer model. This unit would be perfect for a casual home cinema or family. Rated 5 out of 5 by MrTotum from Quality Product Quality product from the start. Very easy to set up and use. The problem is the background image always starts a few pixels off the bottom of the div. I'm assuming this is due to the margin/padding. Any ideas on how to get the background image to start at the bottom of the image instead of a few pixels off? Here is my sample code Title Text .toppics { margin: 0px auto; width:500px; height:100px; padding:0px; background-repeat: no-repeat; background-position: 0px 0px;
